Central Intelligence Agency

Washington, D.C. 20505

85-1522/1

16 MAY 1985

The Honorable Glen T. Urquhart
Chairman
National Capital Planning Commission
1325 G Street, N.W.
Washington, DC 20576

Dear Mr. Urquhart:

We are in receipt of your correspondence concerning the installation of security improvements. During the past year the Central Intelligence Agency has installed hydraulic barriers at the Route 123 and Parkway entrances to the Langley compound. In addition, concrete flower boxes have been placed at certain vulnerable building entrances. Although these actions were not coordinated with the National Capital Planning Commission, the selection and placement of these security enhancements were made with due consideration given to their effectiveness and the esthetics of the surroundings in which they were being used.

Upon the completion of the new building Headquarters expansion in late summer of 1987, we intend to install additional hydraulic barricades at the entrance to our power plant, and at the Turkey Run Road west parking lot entrance. As plans are developed, we will coordinate them with the Commission.

Sincerely,

Harry E. Fitzwater
Deputy Director
for
Administration
